

## ABOUT US

We have been operating in the market since 1990. We use modern machinery exclusively from LONATI. For the production purposes we use top quality natural yarns as well as advanced technical fibres.

## SPORTS OR OUTDOOR SOCKS

The sports and outdoor socks are intended for active people, who consider practicing sports as the best form of repose. In our both collections everyone will find the most suitable model. Our socks are systematically tested by representatives of numerous sports disciplines and, owing to their opinion, we can constantly improve our products.

## INDIVIDUAL SOCKS COLLECTIONS

We specialize in production of individual socks collections. Our company offers high and complete customer service including: designing socks, production, packaging and shipment.

We offer various types of labels, gift boxes, bands or silicone ABS...

## OUR MACHINES

We produce socks 7 days a week and 24 hours a day. Owing to this, we have a large production capacity. Our company ensures short production and delivery time — even 14-30 days.

Working with the use of 156, 168 and 200 needles machines makes it possible for us to maintain a diverse and large range of available patterns and socks structures.

## ENVIRONMENT

We create and develop sustainable collections of socks using only OEKO TEX certified yarns with an emphasis on organic natural or recycled yarns. Our company supports charity organisations and local hand producers.
